DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29, 42, and 43, drawn to the management of groups of authorized and unauthorized devices, classified in class 713, subclass 201.
 - II. Claims 30-41, drawn to the outputting of key information from a device, classified in class 380, subclass 25.
 - III. Claims 44-50, drawn to device compliance analysis, classified in class 380, subclass 2.

The inventions are distinct, each from the other, for the following reasons:

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I discloses a method for authorizing devices through the use of group memberships; invention III has separate utility such as the ability to test a device for compliance to any of a number of methods for determining group membership, including methods not disclosed in invention I. See MPEP § 806.05(d).

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus in invention II can be used in conjunction with any of a number of access control methods, including methods not disclosed in invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
